Fast, Secure, Simple Remote Access Solutions for Education

From a company that puts you first

HARVARD UNIVERSITY · Penn UNIVERSITY of PENNSYLVANIA · Duke UNIVERSITY · MIT Massachusetts Institute of Technology · UCLA · Stanford University · USC

HIGH-PERFORMANCE REMOTE ACCESS

"Our students use Splashtop to remote into on-campus PCs and iMac Pros from Chromebooks and other devices, and run apps like Adobe, Autodesk, and Avid. When we started using the scheduling feature, it took our program from being great to awesome."

Chris Gilbert, Application Technical Analyst, Wayne State University
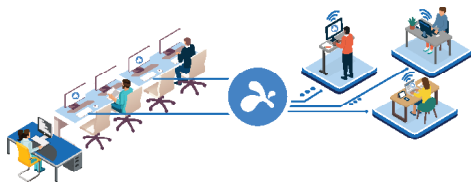

EFFECTIVE REMOTE SUPPORT

"We would not have been able to support this many devices without Splashtop. It provides great performance on our Macs as well as mobile devices and made our support sessions go much more quickly than without it. It's been invaluable!"

Tracy Dilossi, Systems Administrator / Technology Support, Ridley School District

INCREDIBLE CUSTOMER SUPPORT

"I just wanted to send my appreciation to you and your wonderful support team for getting us sorted out with Splashtop… everyone at Splashtop has been excellent in guiding me through the setup of the system! I have to say that the customer support for this product is the best I have ever experienced."

Rick Campion, Technical Operations Manager, Music Department at Goldsmiths University of London

Students have the ability to remotely work on powerful campus computers that require specialized, CPU intensive software applications that are impossible to transfer to the cloud.

Adobe Creative Cloud · AUTODESK AUTOCAD · ArcGIS · DS SOLIDWORKS · PRO TOOLS · Rhinoceros

Enhance Distance Learning with Splashtop Enterprise for Remote Labs

- **Remote into on-campus computers with high performance sessions** and access apps and data as if you were sitting right in front of the computer.

- **Use any computer or mobile devices like Chromebooks and iPads** to use desktop apps like Adobe and Autodesk, and leverage the processing and computing power of existing lab computers.

- **Easily deploy, set up and manage** with enterprise-class features like single sign-on integration, scheduling time-slots, group-based access, granular permissions, and more.

- **Provide helpdesk support to teachers and students** with on-demand access to their computers and mobile devices.

- **Provide anytime/unattended IT support** to computers with remote computer management tools.

- **Flexible licensing options** allow you to select a combination of concurrent student/staff remote access licenses and technician licenses to fit your needs.

Security is Our Priority

Splashtop is trusted by 85% of the Fortune 500 companies as well as banks, law enforcement, government agencies, and other organizations operating in industries with stringent security requirements where controls for data privacy and systems security are mandated.

splashtop

Secure by default!

- TLS and 256-bit AES encryption
- 2-factor authentication
- Support for SOC 2, GDPR, HIPAA, FERPA, PCI, ISO 27001, and other standards

With a robust set of security features including industry standard **TLS 1.2 with AES 256-bit encryption, device authentication, two-factor authentication,** and more, Splashtop solutions are purposefully built to enable organizations to secure and protect data while providing employees with the flexibility to access it from anywhere. Activities are logged and available for reporting. Splashtop security features also help support **SOC 2, GDPR, HIPAA, FERPA, PCI, ISO 27001,** and other industry and government standards and regulations.

Additionally, for the European Union, Splashtop maintains a separate cloud infrastructure.
