

Splashtop On-Prem

The self-hosted, on-premise remote access and remote support solution.

Leverage the power of Splashtop's secure and high-performance technology to give employees remote access to their computers and also enable IT to remotely access and support devices.

Key features and benefits

- **Secure Connections** – Get secure infrastructure, intrusion protection, SSL/AES 256-bit encryption and other advanced security features.
- **Active Directory & SSO Integration** – Authenticate through Active Directory or SSO / SAML. Splashtop supports SSO integrations with Okta, Azure AD, ADFS, JumpCloud, OneLogin, Workspace ONE, G-Suite, and TrustLogin.
- **Access Control with IP Restriction** – Restrict access to Gateway based on user IP.
- **Splashtop Connector** – Securely bridge RDP and VNC connections to Windows computers and servers through Splashtop without using VPN or installing any remote access agent.
- **Syslog Integration** – Export log data to a syslog server for SIEM system to retrieve and analyze.
- **High Performance** – HD quality, fast connections in real-time, frame rates up to 60 fps, minimized latency, performance indicator, quality settings and more.
- **Multi-Monitor Support** – Remote into multiple monitors connected to your workstations.
- **Broad Device Support** – Remote into your Mac, Windows or Linux computer from any Mac, Windows, iOS, Android, or Chromebook device.
- **Scheduled Access** – Schedule times for when users can remotely access computers.
- **Microphone Passthrough** – Users can transmit input via local microphone to the remote computer as the microphone input.
- **USB Device Redirection** – Redirect a USB device (smart card reader, security key, stylus/HID device, or printer) on your local computer to the remote computer.
- **Unattended Android/ Rugged IoT Support** – Splashtop On-Prem provides remote access and remote support to any Android device from any computer or mobile device even without an end-user present. Android devices include smart phones, tablets, POS devices, kiosks, set top boxes and more.
- **Open API's** – Automate workflows and seamlessly integrate Splashtop into existing applications for smoother IT operations.

Who benefits?

Organizations looking to give employees remote access to their computers as well as provide easy and secure remote support for devices.

- Financial executives can stay on top of business by remotely accessing and analyzing sensitive data securely from anywhere.
- Government field agents can access applications without downloading confidential information.
- Healthcare professionals can securely access patient records while maintaining confidentiality.
- Creatives working remotely can access their high-end workstations, files, and applications at their fingertips.
- IT Departments can remotely access and support unattended devices, as well as support unmanaged, attended computers on-demand.

**Use customized controls for
3D CAD/CAM on iPad**

Remote Support

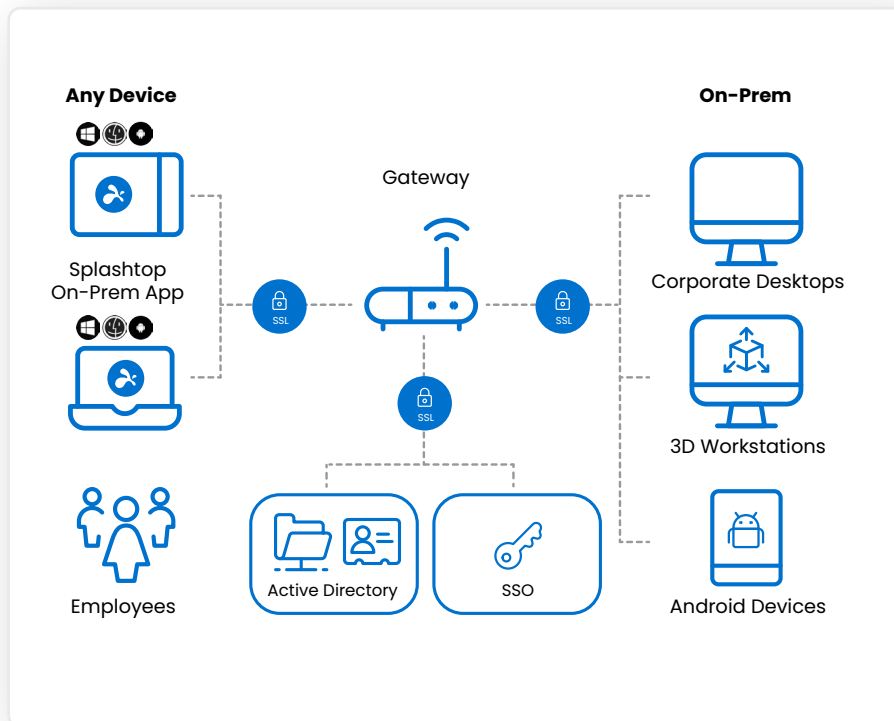

IT teams can provide attended quick support to any Windows, Mac, iOS, and Android devices without prior installation, using a 9-digit session code.

Architecture

Install the Splashtop On-Prem Gateway in your DMZ or behind your corporate firewall. Remote sessions can negotiate peer-to-peer across locally routable networks or bridge through the Splashtop On-Prem Gateway for cross-network access.

High-Availability Clustering

Eliminate downtime and optimize performance with load-balancing and high-availability server clusters.

Pricing

Every user or admin can access, control and support physical computers, virtual computers, virtual desktops, and Android devices from all their mobile devices and computers.

Pricing is based on number of users, concurrent technicians, or endpoints. Contact us for pricing.

Save 50% or more when compared to other remote access and remote support solutions.
