Endpoint Security
Purchase, track and manage Bitdefender Security Tools Antimalware through your Splashtop web console
View protection status for Windows computers running Bitdefender, Windows Defender, Kaspersky and other endpoint security solutions
Monitoring and Management Features
Background actions - Task manager, registry editor, device manager, service manager
Configurable Alerts - Monitor computer status, software installation, memory usage, and more
Windows Update Management - View available updates, install updates, schedule updates
System Inventory - View and compare snapshots. Change logs. Download computer system hardware and software inventory reports
Event Logs - Get quick access to a computer's Windows event logs in the Splashtop web console
Remote Command - Send command line or terminal commands to a remote Windows or Mac computer's command prompt in the background.
1-to-Many Actions - Simplify endpoint management by instantly executing or scheduling tasks to multiple endpoints simultaneously. Includes mass deployment software install, remote command, script execution, system reboot, file transfer, and Windows updates
End-user Remote Access - Create up to 50 end-user accounts and give those users remote access to their computers that are managed under your account
